Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

The amendment filed on 2/4/2004 under 37 CFR 1.131 is sufficient to overcome the Wakisaka and Kawasaki references.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-11 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Raud et al. (6,125,341).

As to claims 1 and 6, Raud teaches in a speech recognition system, for use by "computing devices", having multiple recognition vocabularies, a method for reducing the number of words that are matched with an input utterance of a user, comprising the steps of"

a) prompt the user to make/speak an initial selection of a working vocabulary set and receive the selection (s104, s106) ;

b) compare the initial user selection (s108) and "If a match is found with significant confidence, CPU 12 loads a vocabulary from vocabularies 36.sub.1 -36.sub.n, corresponding to the word matched, from inactive vocabulary memory 26 into active vocabulary memory 24, in step S110. This vocabulary is referred to as the "Working Vocabulary"." (Col.5, lines 40-45)

Art Unit: 2655

c) load the corresponding working vocabulary to be used for matching
speech (s110, Col.5, lines 48-53) ;

receive user utterance and

match the utterance to the words in the working vocabulary.

Raud explains, in claim 1 "selecting a working speech recognition vocabulary for recognizing speech from said plurality of speech recognition vocabularies based on a response by a user to an initial prompt;
receiving a spoken word to be recognized;
....correctly recognizing said spoken word using said working speech recognition vocabulary "

As to claims 2-3 and 5 Raud teaches repeating the process, notifying the user selection, and where the user input includes word (Fig.3).

Claims 7-11 and 13 are analogous to claims 1-6 and are rejected for the foregoing reasons by Kawasaki et al.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
